

To, FCC

subject: NAB's Petition 04-160

Sir,

This petition is nothing but the show off of power and not to let the industry to grow.

XM radio is using the latest technology, coast to coast america to provide superior reception and sound quality to their customers. We pay to get this kind of service. how come couple of people because of their own benefits are trying to stop this service. We get the latest news weather and traffic info anywhere in US. we don't even have to tune the channel if we are traveling one state to another states. That is the proper use of Technology and if you want to shut down their channels, it clearly shows that you are not interested in getting any benefit from technology and you don't want anyone else in the US to get benefit from it.

I would really vote againts this petition and request FCC to reject this petition.

Thanks

Imran Mushtaq
